Summary

Final-year undergraduate in Computer Science and Engineering (AI ML) with academic and project experience in Python, Flask, and SQL. Proficient in machine learning, natural language processing, and backend development. Enthusiastic about learning new technologies and applying them to build practical software solutions. Strong interest in solving real-world problems through technology and eager to contribute as a fresher in the software industry.

Skills

Programming Languages: Python, SQL, Java.

AI & Machine Learning: Machine Learning, NLP, Text Preprocessing, Prompt Engineering.

Web & Full Stack: HTML, CSS, JavaScript, Flask, REST APIs

Tools: Git, GitHub, VS Code.

Projects

AI Resume Analyzer

Python, Flask, NLP

- Developed a web application that analyzes resumes to check ATS compatibility and identify missing keywords.
- Applied NLP techniques for text extraction, preprocessing, and job-role matching based on resume content.
- Built Flask-based backend APIs to process uploaded resumes and provide real-time feedback to users.

PromptCraft AI – Smart Prompt Builder

React, Node.js, Express.js, OpenAI API

- Developed an AI-powered full-stack application that transforms simple user input into structured and professional prompts.
- Built the frontend using React and the backend using Node.js and Express.js, integrating the OpenAI API for prompt generation.
- Implemented prompt templates, history tracking, and side-by-side comparison of original and improved prompts.

IdeaHub – Project Management Portal

Flask, SQL

- Developed a web-based portal to manage and showcase academic projects in a centralized system.
- Implemented role-based authentication and CRUD operations for adding, updating, and organizing project details.
- Designed the backend and SQL database to store project information efficiently and support easy retrieval.

FarmSe – Agribusiness Platform

Flask, SQL

- Built a full-stack web application to support agricultural workflows and connect users with digital services.
- Developed REST APIs and designed the SQL database to manage structured agricultural and user data.
- Enabled digital interaction between farmers and stakeholders through an accessible web interface.

Experience

AI Intern – Edunet Foundation (AICTE)

2025

- Developed machine learning mini-projects using Python and preprocessing techniques.
- Evaluated models and improved data quality for better performance.

Artificial Intelligence Trainee – Infosys Foundation (ICT Academy)

2025

- Completed 100+ hours of AI training and built a phishing email detection model.
- Applied text preprocessing and classification techniques.

Data Analytics Intern – Cisco Networking Academy

2024

- Cleaned, analyzed, and visualized datasets using Python and Excel.
- Extracted insights to support data-driven decisions.

Education

B.Tech – Computer Science and Engineering (AI & ML)

2022–2026

Jyothishmathi Institute of Technology and Science, Karimnagar

CGPA: 8.7/10(till date)

Intermediate (12th)

2020–2022

Alphores Junior College, Karimnagar

Percentage: 82%

SSC

2020

Nava Bharath English Medium High School, Husnabad

CGPA: 10/10

Certifications

ML & DL – Infosys | Data Analytics – Cisco | Data Science – Forage | GitHub – LinkedIn | IBM Chatbot | Prompt Engineering
